The following Bill, together with the Statement of Objects and Reasons accompanying it, is published for general information, under Rule 31 of the Rules for the conduct of business of the Legislative Council

A Bill to amend the Towns Conservancy and Improvement Regulation III of 1076 (as amended by Regulation V of 1085).

Whereas it is expedient to amend "The Towns Conservancy and Improvement Regulation, III of 1076, as ammended by Regulation V of 1085"; It is hereby enacted as follows:—

Insert the following as Section 64 A.

64A. (1) The President or any person appointed by him in writing for that purpose may at all reasonable times enter into and inspect any place used for the manufacture or sale either wholesale or by retail or for the storing of articles of human food or drink intended for sale or wherein such articles may be detained and may examine any such articles which are therein.

(2) If it appears to the President or such person that any such articles are unfit for human food or drink he may detain the same and may cause them to be produced before any Magistrate.

(3) If the Magistrate finds that such articles are unfit for human food or drink he shall order the same to be destroyed, or so disposed of as to prevent their being exposed for sale or used for human food or drink.

(4) If the Magistrate finds that the articles so detained were fit for human food or drink he may make an order directing the President to return such articles or such portion thereof as may be in good condition to the owner or to the person in whose possession such articles were found and to pay to him from the Town Fund such reasonable amount as the Magistrate considers will compensate such owner or person for any loss or depreciation that may have been caused by such detention.

STATEMENT OF OBJECTS AND REASONS.

There is at present no clear and explicit provision of law in Travancore similar to what is found in British India for the due control of the manufacture and sale of aerated waters and food stuffs in the towns in Travancore. It is found in experience that often unwholesome food stuffs and aerated waters are offered for sale, sold and consumed by the public to the detriment of public health, by bringing in epidemics in its wake. The present draft bill which is more or less similar to Section 204 of the District Municipalities Act, IV of 1884, (Madras Presidency) is prepared vesting in the President of the Towns Conservancy and Improvement Committee with power of inspection and control in these matters.
